

RECONSTRUCTING SR 32

APRIL 2024 NEWSLETTER

Welcome to the Reconstructing SR 32 newsletter. The information is current based on the date it is printed (April 18, 2024).

About the Project

Reconstructing SR 32 is an important project due to the pavement on this section of the road reaching the end of its useful life and needing replacement. Properly maintaining this infrastructure requires replacing this section of pavement, including addressing drainage issues. Part of the overall project includes intersection improvements along SR 37. **Stay up to date by visiting our website at www.ReconstructingSR32.com and following us on social media.**

Phase 1 Construction Ending Soon

Weather permitting, construction will be ending in the next two weeks for Phase 1, which is the intersection of SR 32 and 16th Street. Construction began earlier this month, and crews have been replacing the pavement and reconstructing storm sewer lines in the area.

Phase 2 Construction Begins

Crews will be moving to Phase 2 soon, which includes construction on SR 32 from 9th Street to 14th Street. Weather permitting, this work will begin April 23 and is anticipated to last until early June. During this phase, crews will be replacing pavement and reconstructing portions of the storm sewer in the area. Given the historic nature of this area, we will be preserving the existing trees and sidewalks to the best extent possible.

Downtown Noblesville businesses are still open, and pedestrian detours are available for anyone visiting the shops or restaurants. See attached map for more details.

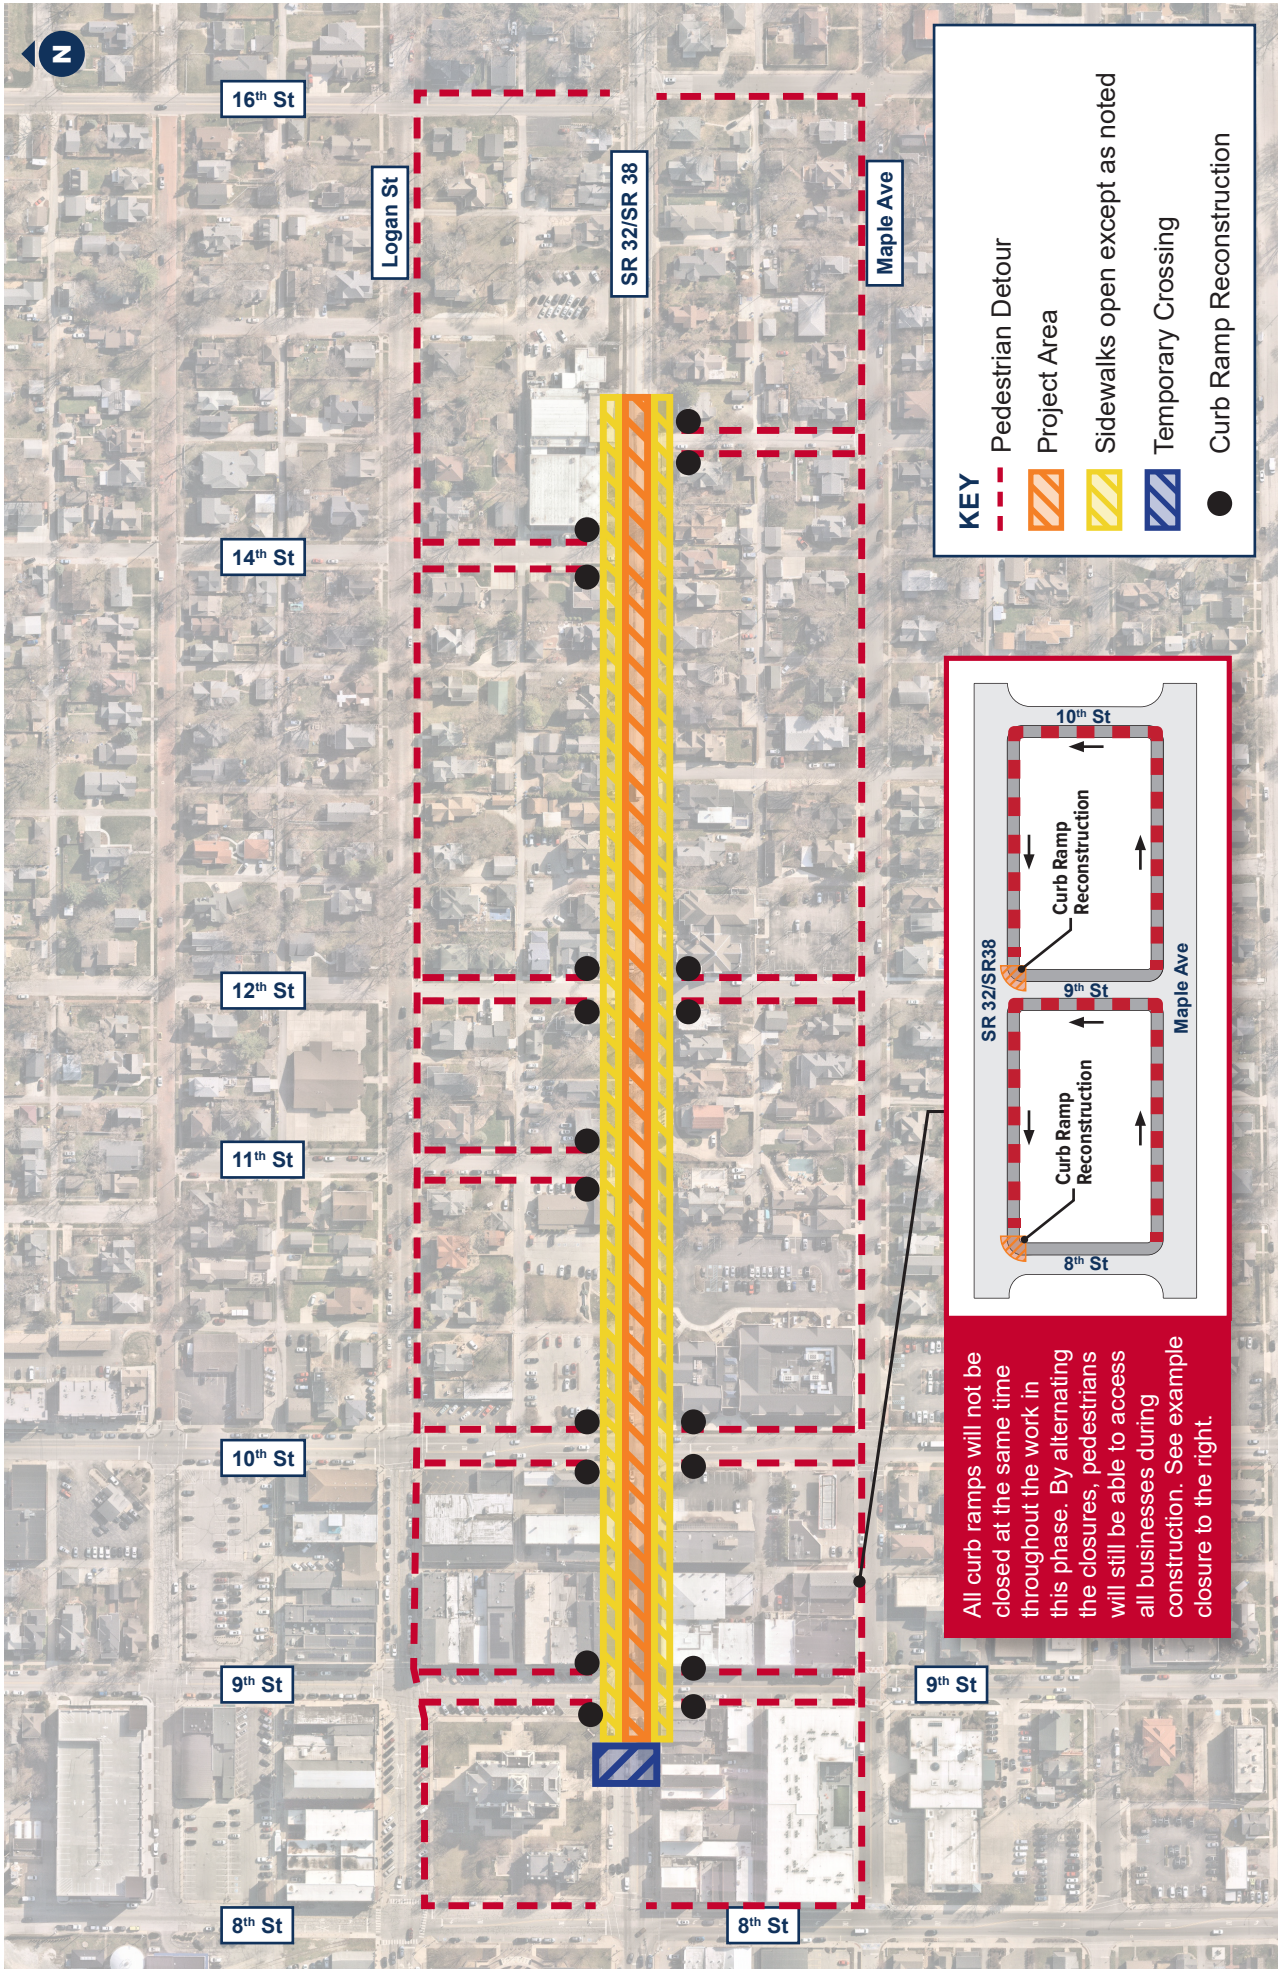

Support Local Businesses

Downtown Noblesville is home to many locally owned shops and restaurants. We encourage you to continue shopping and eating at these small businesses as construction continues in the area. We have been working with local businesses and Noblesville officials to help minimize public impact despite the construction. Pedestrian detour routes are available, and there is ample parking in downtown Noblesville.

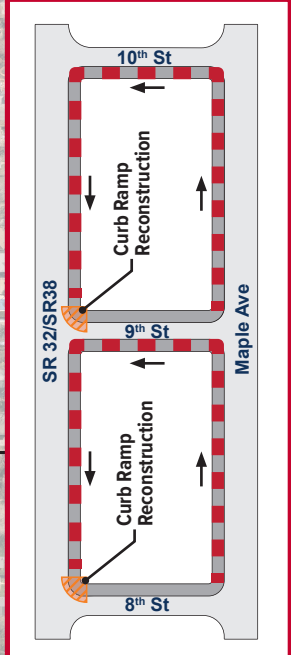

Scan the QR code to learn more about downtown parking.

The information is current based on the date it is printed (April 18, 2024). INDOT reminds drivers to consider worker safety by slowing down, using caution and avoiding distractions when traveling in and near work zones. All work is weather-dependent, and schedules are subject to change.

All curb ramps will not be closed at the same time throughout the work in this phase. By alternating the closures, pedestrians will still be able to access all businesses during construction. See example closure to the right.

KEY

- Pedestrian Detour
- Project Area
- Sidewalks open except as noted
- Temporary Crossing
- Curb Ramp Reconstruction
